Experts
Trained on
WESMAR
products and
ready to help
their customers*

"This was one of the more comprehensive training classes I have attended. Not only did we have the opportunity to learn in a classroom setting, but being able to actually break down and rebuild the stabilizers and thrusters gave me real world experience that I can bring back to my customers."

Congratulations Jed Wood at Whiticar

Jed Wood, from Whiticar Boat Yard, Stuart, FLA successfully completed the WESMAR Sales and Technical Service Training Seminar, August 2017. He is shown here receiving congratulations from WESMAR President Bruce H. Blakey.

WESMAR's annual Dealer Seminar August 14 and 15 brought technicians, sales and management personnel to the WESMAR plant near Seattle for product training .

Training included two days in the classroom and on the manufacturing floor assembling, testing and operating WESMAR's new DSP5000 stabilizer systems, our broad line of bow and stern thrusters, hydraulics, and sonar

systems. The training included valuable sales and installation training as well.

WESMAR is the pioneer of solid state sonar, digital color sonar, dual prop stainless steel bow thrusters and sophisticated digital roll fin stabilizer systems. The company has led the industry in innovative design for over 50 years, and remains one of the few marine electronics companies designing and manufacturing in the

US. WESMAR has been training its worldwide dealer network at seminars for nearly 30 years. Each year groups from around the world come for training. The August seminar is always the largest group and includes manufacturing and installation training right on the manufacturing floor.

WESMAR President and founder Bruce H. Blakey opened the Seminar welcoming the dealers and explaining what lead him
